

ASUS ESC4000 G4

High performance 2U accelerator server with 16 DIMMs and 8 hot-swap HDD bays

Intel® Xeon® Scalable platform design

ESC4000 G4 is built on the Intel® Xeon® Scalable Platform to deliver incredible 2U server performance, packing incredible power into minimal space. 16 DIMM slots provide best-in-class memory capacity and bandwidth, and an integrated I/O controller on the processor eliminates data transfer bottlenecks caused by discrete I/O chipsets for reduced latency and dramatically faster system performance.

Flexible choice on versatile accelerators

ESC4000 G4 supports up to four double-deck server GPUs in a 2U form factor. Broad GPU support including NVIDIA, AMD and Intel.

Maximum flexible 8+3 expansion slots in a 2U server

ESC4000 G4 offers eight full-length PCI Express 3.0 x16 (4 at x16 Link or 8 at x8 Link), one low-profile PCI Express 3.0 x24 with support of a riser card for additional one PCI Express x16 (x16 Gen3 Link) and one PCI Express x8. One PCI Express x8 for internal HBA/RAID card. Flexible expandability in a 2U form factor supports diverse storage and networking applications to meet the demands of future expansion and high scalability.

User-friendly design for easier server maintenance

ESC4000 G4 features numerous user-friendly design features that simplify server maintenance. The server's Q-code is visible from the outside of the case to make diagnosing issues easier and more convenient.

Expandable storage for faster transfer speeds

ESC4000 G4 features full-bandwidth port-to-port OCuLink for two NVMe storage devices with 3X faster transfer speeds compared to PCIe switch IC solutions. One M.2 slot accommodates 2280-size SSDs with support for additional OS storage and PCIe 3.0 x4 bandwidth — 5.3X faster than 6 Gb/s SATA III — for faster boot speeds. ESC4000 G4 is ideal for data centers with high storage and processing demands.

Smart thermal design for energy efficiency

ESC4000 G4 features a smart thermal radar design reduces fan power consumption by up to 20% and eliminates the power-sharing board for improved efficiency and lower operation costs.
